Zzz

Mammals of North America

What is a brown bear?

Brown bears live in mountain forests. They are large mammals. Brown bears from America are called 'Grizzly' bears. A brown bear has four legs and deadly, sharp claws. Brown bears are omnivores and eat fish, nuts, fruit and insects. Brown bears hibernate in the winter.

What is a skunk?

The skunk is a small mammal from North and South America with black and white fur. It is an omnivore and eats fruit and snakes. It sprays a smelly liquid when it is scared. Skunks are nocturnal and only come out at night and they live in woodlands.

Zzz

What is a raccoon?

Raccoons are small mammals that live in woodlands. Raccoons are nocturnal omnivores and they eat things like frogs, mice and fruit. Some raccoons live near cities and eat rubbish out of bins! They are 40 to 70 cm in length. This is like the size of a cat.

What is a beaver?

The beaver is a small mammal that lives around ponds, lakes and rivers. They are herbivores and eat tree bark, plants and roots. They have big teeth and webbed feet. Beavers are nocturnal.

Zzz

One day, Bear couldn't hibernate as his friends used him as a mattress and they were noisy and smelly.

So, he made a phone call and drove to a fancy hotel.

At the hotel, Bear loved jumping up and down on the bed and eating lots of snacks.

BANG! THUMP! THUMP! Bear tried to sleep but he couldn't because of all the noise.

Later, Bear still couldn't sleep as he was too hot so he watched some television. But he still couldn't snooze so he ordered some food.

When the food arrived, Bear's friends surprised him!

Finally, Bear and all his friends fell fast asleep.
