

To be able to make equal groups

**MathShed**

**Starter:**  
Which one doesn't belong?

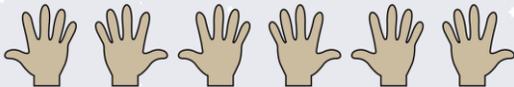

Explain your answer.

To be able to make equal groups

**MathShed**

**Activity 1:**  
The hands below show six equal groups of 5.

How else could we demonstrate six equal groups of 5?  
Explain your answer.

To be able to make equal groups

**MathShed**

**Activity 2:**  
How many ways can you demonstrate:  
a) three equal groups of two?  
b) four equal groups of five?  
c) four equal groups of ten?  
d) five equal groups of three?

Use mathematical equipment, then sketch your representations.

To be able to make equal groups

**MathShed**

**Activity 3:**  
What needs to change below to show five equal groups of four?

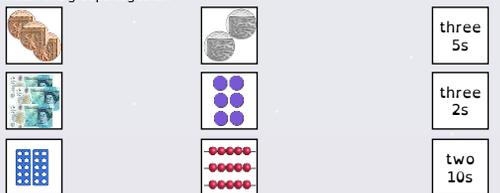

How else could you show five equal groups of four?

To be able to make equal groups

**MathShed**

**Activity 4:**  
Match the groups together.

three 5s  
three 2s  
two 10s

To be able to make equal groups

**MathShed**

**Activity 5:**  
How could the groups below be made equal?

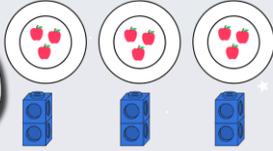

Can you think of more than one way?  
Explain your answer.

To be able to make equal groups

Evaluation:

I have used multilink cubes to show the equal groupings of the apples on the plates.

Do you agree?  
Explain your answer.
