

To be able to multiply three numbers

Starter:

What's the same? What's different?

$$2 \times 3 \times 4$$

$$3 \times 8$$

$$4 \times 6$$

$$4 \times 2 \times 3$$

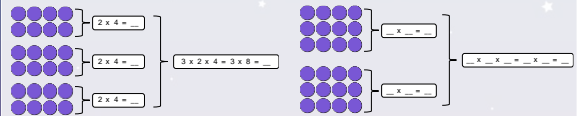

Explain your answer.

To be able to multiply three numbers

Activity 1:

Referring to the representations, complete the calculations below.

To be able to multiply three numbers

Activity 2:

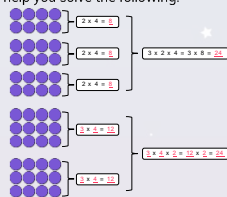

Use mathematical equipment to create arrays to help you solve the following:

a) $4 \times 6 \times 3$

b) $8 \times 6 \times 4$

c) $6 \times 5 \times 8$

d) $7 \times 3 \times 6$

To be able to multiply three numbers

Activity 3:

Select three playing cards at random between 3 and 8.

Use the three numbers represented by your three playing cards to create your own multiplying three numbers calculations.

To be able to multiply three numbers

Activity 4:

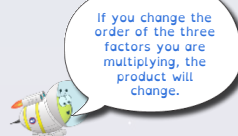

James says, "If you multiply three numbers together and the final product you multiply is odd, the product will be odd."

Is James's statement always, sometimes or never true?
Provide examples to support your answer.

To be able to multiply three numbers

Evaluation:

Is Astrobee's statement true or false?
Explain your answer.
